

Plastic Optical Fiber Mesh

The plastic optical fiber mesh consists of 105 fibers with a diameter of 0.75 mm braided into a mesh structure. The width of the finished product is 7 cm, and can be stretched to 50cm-60cm during installation for different use. Driven by a fiber optic light engine, the mesh can create a glowing surface with different colors.

The product is flexible in structure and can form different shapes to meet a variety of decorative needs.

Specification:

Product Code	FOM-105
Product Description	Plastic Optical Fiber Mesh
Color	Transparent
Material	PMMA
Fiber Strands Diameter	0.75 mm
Number of Fiber Strands	105 pieces
Static Width	7cm
Extendable Width	50cm
Packing Length	100-150m/roll
Luminous Type	Side-Glow
Operating Temperature	-20°C ~ 40°C
Storage temperature	-20°C ~ 70°C
